

Fabrication & Machining

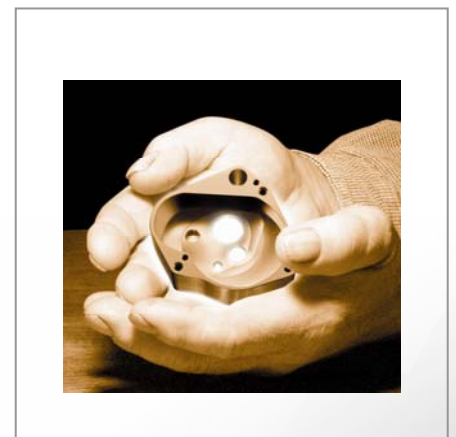

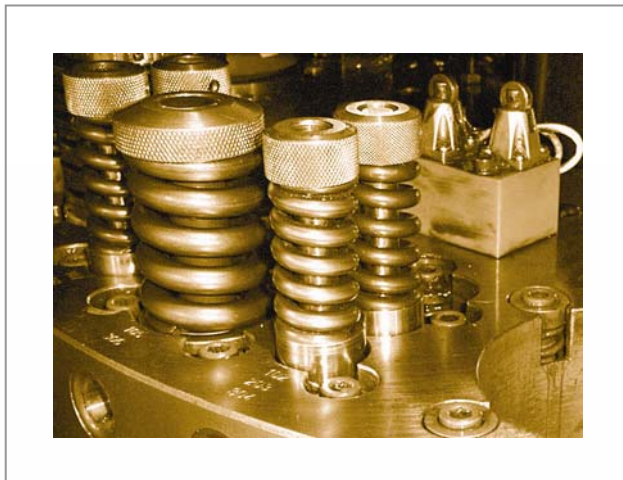

Since 1952, Weco Manufacturing has been evolving and growing at the speed of business. From our start-up roots to today's sophisticated capabilities, Weco is known for on-time quality work, no matter what size project.

Weco's single source responsibility for all aspects of metal product manufacturing (initial design, prototyping, fabrication, machining, finishing, cable assemblies, wire harnesses, electromechanical, sub-assemblies and final product assembly) provides convenience and peace of mind. Our vertical integration and systems also enhance communication and project management - delivering better quality, predictability and cost efficiency. The bottom line is a more profitable partnership for everyone.

Weco's fabrication and machining capabilities include shearing, punching, laser cutting, deburring, forming, welding, spot welding, hardware insertion, orbital riveting, milling centers, turning centers, machining centers, grinding, surface finishing, EDM, CNC, full finishing facility and sub-assembly/testing department.

Weco offers complete single-source solutions, design-to-finish. As a strategic partner, we provide the Lowest Cost to Market possible for all finished good products. Guaranteed.
