**RoHS** (“restriction of hazardous substances”):

Seller is aware of the European Union Directive 2002/95/EC and its requirements on the restriction of the use of certain hazardous substances in electrical and electronic products and equipment.

All internal process material fabrication, machining and finishing operations controlled by Weco Manufacturing are fully compliant. However, if Buyer specifies the material and type of finish used, then Buyer is solely responsible for compliance since Seller does not have material specification control.

If Buyer has questions concerning the directive or requires assistance in material selection for compliance, Seller will work with Buyer to determine the best alternatives necessary for correct selections.
